Day1.

Myself Devathai.

This is my first day of the internship. On the first day of the internship, was introduced to Mr.Koushik and the other interns. Then was told about skill development and what is skill stack. I was asked to rate my top 5 skill and rate it from 1 to 5. I realised how far I'm in those skills and need to improve on those. In the afternoon session had a discussion on Problem Solving. How to solve the problem in the better way. The only way to become better problem solver is my solving more and more problems. Mainly Reading ,Writing ,Speaking is very important for do smart work using AI. Problem solving is necessary in any field and any areas so it always in demand.
